**470g**

Stainless Steel  
Carbon Steel  
Aluminum  
Rubber

## Quality and Design

The body of the Rhino is made of aluminum, which is light and rust resistant. The ears part is made of rubber to distinguish it from the solid part, and gives it a sense of cuteness. The materials of the handle are of high quality and perfect for professional tools. The hammering surface uses stainless steel to strengthen the practical aspect and its surface is expertly painted with a non-toxic material which is safe and is able to be stored in your house.

## Special Edition

There is a special edition in silver. The limited version of Rhino Hammer has no extra surface treatment, which remains the original color of the metal in order to show its uniqueness.
